

During EBACE2015, Global Jet hosted its guests at its Geneva headquarters

## GLOBAL JET 15<sup>th</sup> ANNIVERSARY CELEBRATION

Founded in 2000 Global Jet is one of the largest wide-bodies and Bombardier Global aircraft operators in the world. "We have been able to implement our business model and to make it successful. We never lowered our quality standards and we stayed true to our core values: Safety, Quality, Integrity, Passion and Dedication", states Bjorn Naberhuis, Vice-President for Business Development.

Developing its activities in Asia in the past few years, with offices in Beijing and Hong Kong, the company obtained a Chinese AOC, through its joint venture with the Jinggong Group. Based in Hangzhou, Jinggong Global Jet Co, Ltd employs nearly 30 people. The first commercial flights should be performed by the end of summer. "So far, we are operating successfully 6 private aircraft in this part of the world: A Falcon 2000, a G450, a Falcon 7X, a Global Express, a Global 6000 and an Airbus ACJ319. Another Airbus ACJ319 should be entering our fleet very soon," explains David Mezenen, Business Development Director Asia/Pacific. Since January, a private Global 5000, a commercial Challenger 605 based in Farnborough, and a commercial Citation CJ4 based in Le Bourget joined the fleet. Additionally, the operator has been selected to manage one of the first Gulfstream G650 on the market, and more projects of this kind should materialize in the near future. One of the Global Expresses available for charter went through extensive maintenance and was entirely refurbished. Its

entertainment system is now brand-new and boasts the latest, state-of the art Ovation Cabin Management System equipment from Honeywell. With 8 Airbuses and 5 Boeings among 70 aircraft in management, and over 500 employees worldwide with offices in nearly a dozen cities, Global Jet is ready for many more years to come.
