

## GLOBAL JET

### Legacy 450

In addition to a brand new 14 passenger Gulfstream 650, that joined the fleet of aircraft available for charter earlier this summer, Global Jet has also been appointed to manage and operate a privately owned brand new Legacy 450, one of the few charter aircraft available in Europe.

Fly by wire cutting edge technology, the Legacy 450 is best suited for the European charter market, with an ability to fly into short runways, ideal for fast and safe city pair trips. The Brazilian manufacturer highlights that the 8 passenger Legacy has the best cabin pressurization in its class delivering maximum comfort for reducing the impact of jet lag.

With more than 70 long-range corporate jets currently under management, Global Jet focuses on fulfilling strong demand for mid-light aircraft. The aircraft will be available for charter from end of August.
