

CJ2 is a departure for Global Jet

Two additions to the Global Jet fleet, a Global Express XRS and a CJ2, will enable the sales team to offer customers a wider choice and newer aircraft. The XRS will be the third of the type in its commercial fleet and has a high tech cabin accommodating up to 10 passengers in comfort.

Something of a departure for the company, the CJ2 is the smallest aircraft in the fleet with seating for six passengers. Sales and marketing assistant Héloïse Faury explains: "We actually seized an opportunity. This kind of cabin was perfectly adapted to some of our clients' charter needs.

"Broadening the type of aircraft we operate is a way to achieve our main goal of meeting our clientele's wishes."
