

Global Jet's latest 7X fully equipped for long haul travel

Global Jet has taken delivery of a 2013 Falcon 7X. The new aircraft features an high definition entertainment system, satcom, wi-fi, touchscreens, iPod docks, dvd and cd players. The galley also includes a Nespresso Lattissima machine, an oven and a microwave.

This latest Falcon 7X will be based between Moscow and the French Riviera. The three engine configuration allows it to fly between Paris and Hong Kong non-stop or to reach Los Angeles from São Paulo. While flying long-haul trips, passengers can opt for either four single and one double bed or three singles and two doubles.

"We are really proud to present this aircraft to our customers," says Abner Tato, Global Jet marketing and quality director.

"This product features a BMW interior, which means that a subtle, elegant and sophisticated environment is offered to our clients. The cabin is large and bright and offers uncompromising comfort. This Falcon 7X sets the standard for business jets," promises Tato.
