

From Geneva to Maldivian Island

To improve its offer, Geneva-based Global Jet announces the arrival within its charter fleet of a brand-new 2013 Falcon 7X. This 13-seater jet flies faster, farther and higher than any other Falcon ever built.

Catering to customers' needs, the new aircraft features an HD entertainment system, Satcom, Wifi, touchscreens, Ipad docks, DVD and CD players. On board, passengers will also benefit from a fully equipped galley which includes a Nespresso Lattissima machine, an oven and a microwave.

This brand-new Falcon 7X will be based between Moscow and the

French Riviera. The three engines configuration allows this aircraft to fly between Paris and Hong Kong non-stop or to reach Los Angeles from São Paulo in the blink of an eye. While flying long-haul trips, passengers will enjoy the comfort of either 4 single and 1 double beds or 3 single and 2 double beds.

This product features a BMW interior, which means that a subtle, elegant and sophisticated environment is offered to clients. The cabin is large and bright and offers uncompromising comfort. This new Falcon 7X sets a new standard for business jets.
