GLOBAL JET

A fascinating Airbus 318 Elite just entered Global Jet's fleet

The company kicks off successfully the year announcing the arrival of a stunning A318 Elite into its charter fleet. Since the past years, the boutique jet operator has seen the demand for VVIP large cabins grow at high speed from a flourishing Middle East market. The 318 CJ Elite is an excellent product that combines an autonomy of close to 9h15 and a very impressive baggage capacity. In fact, the baggage load is a critical point for any client that wishes to travel with a large amount of suitcases at its maximum passenger capacity.

This newcomer will be the fourth Airbus offered for charter requests but the company manages a total of 8 airbus models altogether. "We have an extensive knowledge in managing VVIP airliners and our crews are qualified far beyond standards and guarantee a maximum safety and an unrivalled high-end service on board" comments the company.

Endowed with a spectacular autonomy, this VVIP wide body will comfortably accompany its passengers from Dubai to London non-stop or from Paris to New York with 80 suitcases for 19 VVIP guests. This very large cabin is designed with a separate bedroom and a spacious VVIP bathroom. Passengers will peacefully rest in a flying palace with its 8 cosy beds.

This is a perfect compromise for clients travelling for business purposes looking for unmatched comfort or those seeking to organise a one of a kind VIP family escapade.

The aircraft is flexibly-based at Le Bourget and is ready to serve any demanding request.
